Inventory System

Inventory System

myAsset Inventory System is specially developed to har ness the power of Inter net technology to provide Inventory Tracking and Management for single and multi-site organisations. The module integrates with the core myAsset Asset Management system to provide a reliable platform for tracking assets that need to be inventoried.

Through this module, you can now track the inventory of your stocks, spare parts, stationeries, consumables and other fixed assets. The idea is that you get more control, faster feedback and more accurate information. That's what we like to call progress.

myAsset Inventory System is a truly mobile, automated inventory system that empowers your organisation's operation with improved accuracy and greater asset visibility. No more wondering what exactly is out there in terms of your fixed assets. myAsset Inventory System also incorporates the use of barcode scanning mobile devices to effectively do stock in or out of Inventory.

This makes taking stock of your assets quicker and much more convenient. On-site inventory audit and stock-take can never be easier. myAsset Inventory System also incorporates stock request and approval workflow via email to facilitate even greater business process automation. The less time you have to spend worrying about how to coordinate communications, the more time you have to make improvements and grow your company.

Enterprise Solution

Asset Management System
Track assets that are on loan out and eventually returned, such as books, files, tools or even IT equipment
